

The marble of Sayans is characterized by the wide color range:  
Light cream, cream, gray cream, pink, gray pink.

### Physical and mechanical properties

Volumetric Weight, kg/ cm <sup>3</sup>	2 720
Water absorption,%	16
Abrasion resistance, g/cm <sup>3</sup>	0,91
Porosity, %	0,37
Compressive strength: In the dry condition, g/cm <sup>3</sup>	800
In the wet condition, g/cm <sup>3</sup>	701
Bending Strength g/cm <sup>3</sup>	216

## MKK-HOLDING

«MKK Holding» produces high-quality products, that are extracted from the marble of Sayans of the Kibik-Kordon field (architectural and construction elements, facing tiles, windowsills, steps, balusters, columns, tabletops).

Our holding is the main supplier of a natural stone for the Moscow's municipal construction orders. According to the program of import substitution, the Holding actively provides natural stone to our customers.

The marble of Sayans has a good reputation as a demand finishing material because of its wide range of colors and its durability. Since 2014, the marble of Sayans was used for facing of new metro stations in Moscow (Delovoy Tsentr, Bitsevskiy Park, Kotelniki, Rumyantsevo, Spartak, Salarevo, etc.).
